

Reflections

R 17,000.00 ex. vat

- "Reflections" was created during a period in Edith's life when she learned to slow down and

appreciate the beauty of the world around her. While spending more time in solitude, she was able to connect with herself and embrace her thoughts and feelings. This made it easier for her to connect with the outside world when she stepped outside. The berries in her story represent the random pops of color and beauty that she noticed, reminding her of a part of herself that appreciates the beauty of life. They filled her mind with beauty and love, which she wanted to spread and share with everyone she met, from a more profound place.
