In *Beast in Snow*, 'Beast', a creature of uncertain identity, appears to dissolve inside her own snowstorm, as she passes through a dark landscape. *Beast in Snow* continues Bonita Alice's ongoing musings on the idea that our relationship with other animals is more complex, mysterious and fundamental to our relationship with ourselves than we might like to imagine. 'Beast' may in fact be part of ourselves, the mysterious landscape may be a landscape of emotion, memory and dreams.
