

Silence

R 1,950.00 ex. vat

"It takes a great deal of attention to be conscious of one's thoughts and actions. Just to look without any judgment or an intention to change or stop a train of thought. To observe in silence, fully aware of all that happens in a moment. And to see it for what it truly is without giving any thought to it.

Therefore, the piece aims to explore a human mind that is endlessly involved in thought and never seems to rest. It never lets one to stop and smell the flowers along the beautiful journey of life. Hence the image of a person made out of a flower with a very turbulent background represents an uncomfortable life situation." Winston Thekiso
