'They stared, and then see it taking on a form ...a lump to the left, and flat in the middle, and a pointed, smaller peak to the right. Yes, yes. Table Mountain between Devil's Peak and Lion's Head. For a moment they were overwhelmed with real joy, before the paralysis return. What terrible tragedy happened here? There are no traces of a city anymore, just ice. It is Jordaan who sees it first, a small glossy lump above the ice, a structure like a glass dome. There they will probably land.'
